

COUNCIL MEETING OF BLACKFOOT MUN. DISTRICT

Minutes of meeting of the Council of the M. D. of Blackfoot, No. 216, held in the Municipal Office, Gleichen, commencing at 10:30 a.m.

Councillors present were: Rev. Thorsen, Deputy Mayor Unbrink, and Councillors Holmberg, Deschamps, Nelson and Wheatley.

The minutes of the previous meeting were adopted as read.

Plans and specifications of guard rails proposed to be erected in the Standard District Highway being taken from the Highway Commission hand from the Highway Commission.

Council Wheatley moved the purchase of guard rail posts be left in the hands of Councillor Deschamps, and the secretary-treasurer be authorized to place at the lowest possible figures—Carried.

Councillor Deschamps: That the necessity of purchasing new guard cable or second hand cable from Turnover Valley was left to the Rev. Thorsen who was authorized to order arrangements for this matter.

The secretary-treasurer reported that C. Theodor Pedersen had taken his office as manufacturer. The Rev. Thorsen reported that the Rev. Thorsen was authorized to order arrangements for this matter.

It was decided to accept the invitation of Rev. Thorsen to hold a meeting at Blackfoot on June 17th, and notify that district that many questions will be answered on this occasion.

A question of an irrigation connection to our office previously discussed at the meeting of June 17th, and notified that district that many questions will be answered on this occasion.

Councillor Wheatley: That upon the Town of Gleichen, which is a question of an irrigation connection to our office previously discussed at the meeting of June 17th, and notified that district that many questions will be answered on this occasion.

It was moved that Mr. J. H. Somers be authorized to order arrangements for this matter.

Councillor Unbrink: That the secretary-treasurer order Atlantic Water Chemical as required—Carried.

Councillor Holmberg: That the amount allocated for public works be divided upon an assessed basis.

Councillor Unbrink: That the secretary-treasurer be authorized to order Atlantic Water Chemical as required—Carried.

Councillor Holmberg: That the amount allocated for public works be divided upon an assessed basis.

Councillor Unbrink: That the secretary-treasurer be authorized to order Atlantic Water Chemical as required—Carried.

DR. KEITH WINS GOLF COMPETITION ON GLEICHEN LINKS

The final round of the Herold district golf competition was played on the Gleichen Links, Sunday June 21st.

The course was in fine shape and the weather ideal and brought a large number of players of both sexes from Lacombe and Brooks. Dr. Keith of Brooks will represent the district having the lowest total score. He played the eighteen holes here in 71 which is really sensational, being three under par.

The ladies served refreshments at the course and everybody seemed to have spent a pleasant afternoon.

After interesting tournaments are a splendid thing and as the Herold competition is concluded so far as the clubs are concerned it is hoped they can all meet again during the summer. There are two or three months yet, unless golfing weather should be at bay.

WATER TURNED INTO THE RESERVOIR SATURDAY NIGHT

Saturday about noon the atmosphere was made that the water was turned into the reservoir between five and six o'clock. Came the hour last there was water in the ditch. The water had been turned into the ditch at George O'Brien's about six miles away, around two o'clock and it was calculated it would reach the dam about 8:30. At half past seven some of the boys went up the ditch and discovered the water soaking around the rate of about a mile an hour, presently it arrived at the gate, but it took about a half mile to fill that and it started to flow into the reservoir about 8:30.

When darkness settled down the water covered an acre or more of ground and was about 8 feet deep in the deepest part. By Monday morning three quarters of the reservoir was covered with water, but the water had stopped coming. It was learned later that during the night rains last week the water had been shut off at Chester Lake. The people of Gleichen have for years, shouted for swimming pool. They now have the pool of water. Certainly some parents announced that if any of their children should be in the water, they would sue the town. When the councillor heard this they put their heads together and decided to protect the town against this possibility by putting up signs prohibiting swimming and in the meantime are seeking legal advice on the matter.

The pipe line has not all laid and the pipe gang is busy installing connectors leading from the mains to the fences of the property holders.

TO GIVE AWAY PURE BREED HOLSTEIN HEIFER

T. H. Beach manager of the full day in connection with the opening of Gleichen's Pressure pipe irrigation system, accompanied by A. F. MacCallum who is in charge of the milk way attractions, journeyed to Strathmore on the train and on Thursday day last to choose from the famous Canadian Pacific Holstein herd. These gentlemen were introduced to Mr. Hay manager of the famous herd and after long and careful consideration Strathmore, Lulu Meckhilde on 1901016 was chosen as one of the milk producing.

Manager Hay taking in to consideration the landable property for which he was offering the heifer, offered a price that was indeed a very liberal one. The deal being closed these two great livestock shows started for home, more than delighted with the deal made but in the midst of their joy with the windmill entered with them they did not see a heavy duty tank truck with the front end broken and the rear end broken. The truck was the property of the City of Strathmore and was being used for the milk way attractions. The truck was damaged and the City of Strathmore is seeking legal advice on the matter.

OVERHEARD ON THE STREETS (By Percy Williams)

W. McConnell in town office—"Re irrigation changes."

John Clark—"Yes O.K. before and after."

A. Bates and Jack James motored to Calgary last week. The visit was most enjoyable.

What about St. and his motor car. He has taken 1931. Jim and Pete are stopped working for R.B.

The strawberry shortcake sale put on by the Strathmore Ladies' Club by the ladies of the United Church was a great success. The strawberry shortcake sale was a big help.

Manager Moss of the Distributors has taken 1931. Jim and Pete are stopped working for R.B.

Everything is going fine with the irrigation project.

Just a little dissatisfaction among the Foreign Legion as to the sale of a newspaper and a renter. Also some fellows do more work in a day than others.

Jim and Pete are certainly two hefty fellows. They are certainly two hefty fellows. They are certainly two hefty fellows.

Joe Guttman says business was fairer than last year.

The pressure tank will be here on Friday. Also the little tank from Montreal which has been on its way since June 1st. It is somewhere between Gleichen and Lake Superior. The rain made everybody feel better.

Roger W. Balson announced an economic problems discussion that business is a part of its worst depression. Others have said that business is a part of its worst depression. The rain made everybody feel better.

The members of the council have decided a saving could be made on paint and the circumstances have decided to be painted as follows: "No painting allowed." By order Town Council.

Don't forget about the discount of 10% on taxes due June 26th, 1931. Ratepayers will do well to try. The discount is 10% on taxes due June 26th, 1931. Ratepayers will do well to try.

The members of the council have decided a saving could be made on paint and the circumstances have decided to be painted as follows: "No painting allowed." By order Town Council.

Basano and Strathmore are putting on celebrations next Wednesday, July 27th, to mark the opening of the new water main.

Basano and Strathmore are putting on celebrations next Wednesday, July 27th, to mark the opening of the new water main. The celebration will be held at the Strathmore Hotel and will include a dance and a meal. The celebration will be held at the Strathmore Hotel and will include a dance and a meal.

Warner Bros. Present— "OFFICE WIFE"

How many business men with that face homes could be run as well as their offices—and that their wives understand their needs as swiftly as their secretaries!

See and hear the story that has started a thousand counterfeits!

SATURDAY NIGHT

WATER TURNED INTO THE RESERVOIR SATURDAY NIGHT

Reduction in price of five cents per gallon on kerosene and fifteen per cent on tractor lubricating oils was made throughout the Prairie Provinces. A reduction is possible because of a decrease in the price of crude oil upon which the cost of all petroleum products is predicated.

At the present time the price of kerosene is reduced to one cent per gallon. This is a reduction of only a fraction of a cent. It is hoped that this will be a small step towards the reduction of the price of kerosene.

It is hoped that this will be a small step towards the reduction of the price of kerosene.

RED & WHITE STORE

Friday, Saturday and Monday
June 26, 27 and 29

Tea Tinfoil packs per lb. 53c
Peanut butter 2 lb tin Red and White 37c
Vinegar Malt or White 2 bottles size, size for. 45c
Chickadee per tin 15c
Pineapple, Sliced Hawaiian per tin 28c
Oranges, Sunlight 2 dozen for 47c
Coffee Fresh Roasted per lb 38c 3 lbs. 11c
Drinks, Oranges or Lemon, Pint Bottle each 25c
Jam, Strawberry, Raspberry 4 lb tin 56c
Pineapple Sliced 5 blades 1 free blade for 25c
Licorice Allsorts, imported from England 1/3 lb 25c
Jelly Powders, assorted Flavors 4 pkgs for 23c

LOOK! ONE LARGE GALVANIZED PAIL

Containing the following Proctor & Gamble soaps
1 Large Chisp or Oxydol, 6 P & G, The White Naphtha, 3 Gold Soap, 2 Guest Ivory, 1 Ivory Flakes, 1 Galvanized Pail (large size) Reg. Value \$1.50
ALL FOR 98c WHILE THEY LAST

R. W. BROWN GLEICHEN ALBERTA

Calgary Exhibition and Stampee, July 6 to 11

Live Stock, Government, Industrial and Domestic Exhibits, The Stampee, The Stampee Parade, Morning Indian Displays, Running Races, Cowboy Ball, Band Contest, Fireworks, "Marathon" Race of 1911 with 100 athletes.

Get yourself a piece of cake, Monday night at Canada's largest birthday party in honor of Mr. P. Burns' 75th birthday. Grand Live Stock Review, an entirely new feature for Friday morning. Free admission for girls and boys under 16 years and free prizes of dainties, poultry, shellfish, pork, two birds and four fowls of poultry.

Be here for the famous Stampee Parade Monday Morning. Special Passes will be given for the parade. Free admission for girls and boys under 16 years and free prizes of dainties, poultry, shellfish, pork, two birds and four fowls of poultry.

A good time to visit Banff and Lake Louise, only three hours from Calgary, over excellent hard surfaced roads.

Canada's Railway Milestones

Fifty years ago, on May 2, 1881, to be exact, the first sod for the construction of the Canadian Pacific Railway was turned, thus commencing one of the great engineering undertakings in the world's history and marking the beginning of the world's greatest transportation system. Enthusiasm for and confidence in this great work was mingled with grave doubts and misgivings, and especially in financial circles in the old world were grey heads shaken in doubt over the wisdom of a young country of small population and no accumulated wealth embarking on such a gigantic enterprise.

The contract for the building of the C.P.R. called for the completion of the project in ten years. It is a matter of history that the last spike of the original main line was driven on November 7, 1885. In other words, construction was completed in four and a half years, and on June 28, 1886, the first C.P.R. train to the Pacific coast left Montreal, arriving at Port Moody, B.C., five and one-half days later.

The building of the C.P.R. was in fact the building of Canada. Without it Confederation could not have been achieved nor continued. It is the steel link which bound all of British North America together. The successful carrying through of this huge undertaking not only gave the people of Canada courage, but it established confidence in the new Dominion throughout the world. It was a visible object lesson, an ever present encouragement to the Canadian people in dark days and in undertaking other great enterprises.

With the completion of the C.P.R. possibly many people of that day thought that Canada's transportation problems were solved. Yet within fifteen years of the driving of that last C.P.R. main line spike, Messrs. Mackenzie and Mann were engaged in building a second transcontinental railway across Canada, and within the brief space of another ten years a third transcontinental was under construction from the Atlantic to the Pacific.

Looking back over the years, and in the light of experience, Canada probably overdid the building of transcontinental main lines, but at the time these works appeared to be necessary and essential to the national well-being and development. Possibly, too, had the Great War not plunged the world into confusion and years of wholesale destruction, the story of Canada's railways would be different. However, to speculate on this is idle. The fact remains that, with that same courage which promoted and successfully carried through the C.P.R., the people of Canada faced and grappled with the problem which confronted them when war broke and the Canadian Northern, Grand Trunk Pacific, National Transcontinental and the old Grand Trunk were plunged into financial difficulties.

Turning back another page in history, we find that it was only eleven years ago, May 26, 1920, that responsibility for the operation of the Grand Trunk passed to the Government of Canada. Thus several main line systems and a conglomerate of badly co-ordinated branch lines, with a top-heavy financial structure, were left on the hands of the Government. Within a decade these have been amalgamated into a mighty and highly efficient transportation machine, with the largest mileage of any railway under one management in the world. An operating deficit of \$32,000,000 in 1920 was transformed into an operating surplus of \$20,884,000 in 1930, and this wonderful achievement is but symptomatic of improvements and advances made in every department of service, until today the Canadian National Railways are a source of pride to every Canadian.

In a previous article it was stated that the people of Canada are an impatient people; that they demand results almost overnight; that they insist on having all those services and conveniences which the people of other lands have devoted centuries to creating and developing. And it is true, but possibly what Canadians have accomplished in the life of one or two generations is responsible for this national trait; perhaps their accomplishments are the result of this impatience. Nevertheless, such a national characteristic has its dangers. With all the advantages of our great transportation systems, we are of necessity paying heavily for past mistakes, — mistakes attributable to our impatience.

And the real danger lies in the fact that we do not appear to have learned the lesson, costly as it has been. We are still vehemently demanding other things which, in our own best interests, it would be wise to defer for a time until we get our feet a bit more solidly on the ground, and secure for ourselves a stronger position where we can the better stand the strain which these additional and admittedly desirable things will impose upon us as a people.

Calgary Exhibition

Poultry Association Endeavoring To Have An Interesting Exhibit

Entry forms to prospective exhibitors in the poultry classes at the Calgary Exhibition and Stampede, to be held July 6 to 11, are being sent out by the exhibition board. Entries close on June 20. A covering letter from Dr. D. S. Macnab, president of the Calgary Poultry Association, urged that some entries be made by all breeders, even though only one or two birds. "Shows and exhibitions are necessary if we are to continue to breed birds true to type," he says. "The value of the opportunity of placing your birds alongside those of other breeders of the variety and comparing them far outweighs the value of any money prizes you may be awarded—welcome as those undoubtedly are."

Recipes For This Week

(By Betty Barclay)

SPECIAL BREAD PUDDING

- 2 cups milk, scalded.
- 2 tablespoons butter.
- 1 cup stale bread, cut into 1/2 inch cubes.
- 1/2 cup sugar.
- 1/2 teaspoon salt.
- 1/2 teaspoon vanilla.
- 1/2 teaspoon almond extract.
- 2 eggs, slightly beaten.
- 1 cup coconut, toasted.

Combine milk with butter and bread cubes. Add salt, sugar and flavoring to eggs and beat slightly. Pour milk mixture over egg mixture and pour in coconut. Pour into greased baking dish, place in pan of hot water, and bake in moderate oven (350 degrees Fahrenheit) to 45 to 50 minutes. Serves 6.

BUTTERSCOTCH COOKIES

- 3 1/2 cups special cake flour, sifted.
- 1/2 tablespoon soda.
- 1/2 tablespoon cream of tartar.
- 1/2 cup butter or other shortening.
- 2 cups sifted brown sugar.
- 2 eggs, well beaten.
- 1/2 tablespoon vanilla.

Sift flour once, measure, add soda and cream of tartar, and sift again. Cream butter, add sugar gradually, and cream together thoroughly. Add eggs and beat well. Add vanilla and flour, mixing well. Shape into round or square loaf, wrap in waxed paper, and chill over night. Remove paper; cut in thin slices. Bake in hot oven (425 degrees Fahrenheit) 8 minutes. Cookies may be sprinkled with chopped nuts before baking. Makes 8 dozen cookies.

Watch Screws For Machines

Smallest Made and 482,000 Required To Weigh A Pound

Watch screws are the smallest made for use in machines. Some of these tiny screws are only one thirty-four-thousandth of an inch in length, the diameter of the head being one twelve-thousandth of an inch. Such a screw has 360 threads to the inch and 482,000 of them are required to make a pound.

Service For Theatre Patrons

Delivery of theatre tickets by motorcycle messengers to any address within 12 miles of the West End, has been started by the Whitehall Theatre in London, England. All playgoers have to do is to telephone the theatre and order the seats. Payment is made on delivery of the tickets, no delivery charge being added.

Persian Balm quickly relieves chapping, windburn, and all roughness caused by weather conditions. Keeps the complexion clear and lovely. Completely absorbed by gentle rubbing. Never leaves undesirable stickiness. Stimulates the skin. Makes it soft, smooth and flawless. Preserves and enhances natural beauty. Soothes, refreshes and invigorates. Makes hands soft and flawlessly white. Imparts that subtle charm so essential to true elegance.

Studying Bird Life In North

J. B. Semple, ornithologist of the Carnegie Museum, at Pittsburgh, Pa., has left with two assistants on an expedition which will take them to James Bay and Hudson Bay where they will study sub-Arctic bird life. They will be gone three or four months.

The Russian workman, forced to quit a job he likes and work where the bosses need him, must rejoice in the fact that he is no longer slave of a Czar.

W. N. U. 1892

UNDER THE SPELL OF THE PAST

Even royalty likes to look back upon the picturesque days of the past, here recalled by this interesting photograph of King George and Queen Mary, when they were the Duke and Duchess of York, attending a brilliant Devonshire House ball in 1897. The 20th anniversary of the coronation of King George is on June 22, next.

Bay Insurance Rates

Hon. R. J. Manion Says Marine Rates Will Be Reduced In Due Time

Marine insurance rates on the Hudson Bay route will be reduced as experience proves the route a safe one, Hon. R. J. Manion, Minister of Railways and Canals, told the House of Commons. It was impossible, he said, to estimate what the cost of shipping grain through Hudson Bay would be compared with the cost by other routes.

Many factors entered into the cost, and insurance rates were one of the most important. Rates on a new or experimental route were always high, he said, answering a question from Hon. W. D. Euler (Lib., Waterloo North). But, if there were few accidents, the rates would soon come down.

People had so often been fooled about different parts of Northern Canada, the minister said, that there was no reason to believe the route would not be a success.

Astronomers May Soon Explore All Universe

Consider It Enormous But Not Infinitely Big

Possibility that astronomers may some day be able to explore with their telescopes to the limits of the universe, was pictured at Washington by Sir James Hopewell Jeans, British astronomer.

"The modern astronomer regards the universe as a finite closed space," he said, "as finite as the surface of the earth, and if he is not yet acquainted with the whole universe, he has good reason to hope that he will be before very long."

"We of today no longer think of vast, unknown and unsounded depths of space, stretching interminably away from us in all directions. We are beginning to think of the universe as Columbus thought of the earth, something enormously big; something whose limits we can fix: something capable of being imagined and studied as a single complete whole."

Invents Unsinkable Ship

The invention of an unsinkable ship is claimed by an engineer in Germany. He has made a steel model three feet long which, under a load of 55 pounds and with holes bored in the sides, cannot be sunk. If pushed under water the vessel rises to the surface again and the water pours out through the holes.

Some fishes of the tropics eat only at night.

"You were doctor to the deceased. Did he know his end was near?"
 "No. Towards his death he did not recognize me!"—Flegende Blaetter, Munich.

Crime In United States

Statistics Show Homicides Doubled In Past 30 Years

Statisticians have completed their annual study of homicide in the United States, and have produced figures that should appall proportionately with the effect of the compilation of a year ago. These researchers have collected data from thirty-one cities with a collective population of twenty-five million people.

In a generation — thirty years — the average homicide rate for these thirty-one cities has doubled. And in one year the rate has gone up from 8.5 to the hundred thousand population in 1929, to 10.9 in 1930.

There were seventeen times as many homicides to the 100,000 as in England and Wales.

Then the statisticians add one significant statement: The number of convictions in murder cases in the United States is decreasing steadily. The number of murders is rapidly increasing throughout the country. — Minneapolis Journal.

Spain Interested In Conference

Special Committee Is Appointed To Look After Contribution To World's Grain Show

Though Spain is busy just now reorganizing its national administration, the importance of the World's Grain Exhibition and Conference to be held at Regina, July 25 to August 26, 1932, has not been lost sight of. A few days ago the headquarters' office of the Exhibition and Conference was advised by the General Director of Agriculture of the Spanish Ministry of National Economy that a special committee of cereal agriculture had been appointed to devote itself to the definite organization of participation by Spain in the World's Grain Exhibition and Conference.

An Interesting Tour

Canadian Chamber Of Commerce To Visit Northern Mining Areas and Churchill This Summer

Many members of the Saskatoon Board of Trade are expected to participate in the Canadian Chamber of Commerce annual tour which this year will consist of a trip through the northern mining areas and then on to Churchill. Returning via Saskatoon the party will go to Regina where the annual convention of the organization will be held September 8 to 10. The exact date for starting for the north has as yet not been determined, Commissioner J. H. Holmes said.

Canada Will Still Grow Wheat

"Wheat growing is a large and important business in the Dominion of Canada and will continue so," said Hon. Duncan Marshall, formerly minister of agriculture for Alberta, addressing a service club at Stratford, Ont. "The western farmer is not discouraged; he is not going out of the wheat-growing business because prices are low," he declared.

An authority claims that a goose can live 50 years. Quite a number of humans just begin to realize it at that age.

Although most glaciers are shrinking, some are advancing.

Gold Prospects Not Promising

Geologist Does Not Expect That Gold In Large Quantities Will Be Found At Fife Lake

It is hardly likely that large discoveries of gold will be made in the Fife Lake area south of Moose Jaw, Sask., considered Professor F. H. Edmonds, of the Department of Geology at the University of Saskatchewan, when questioned regarding possibilities in that area.

Hay Mountain Creek drains what are known as the Saskatchewan gravels, round water-worn quartzite boulders which were carried by great rivers flowing from the Rockies, in the times before this area was invaded by the glaciers some 30,000 years ago, he pointed out.

It is possible that a certain amount of gold deposited as placers in these gravels might have been re-sorted by later water action. There is also a possibility that material brought down from the north by the glaciers might have been re-sorted with a separation of gold.

A small amount of gold might have accumulated in either of these ways, but it is not where one would expect to look for it, he said.

Japanese Going Into Poultry

Five Thousand Eggs From B.C. Shipped To Japan In One Week

Five thousand British Columbia eggs were shipped in one week to Japan. Japanese experts visited British Columbia poultry farms and selected, almost to an egg, the hatching stock they required. Then they went to the Record of Performance officials, Winch Building, Vancouver, and placed large orders. These eggs sold at prices ranging from \$5 for each egg to \$10, \$20 and \$30 a dozen. T. J. Smith of the R.O.P. organization, Vancouver, says that the Japanese, formerly buyers of B.C. hens and cockerels, are now getting well into the poultry business and are learning scientific hatchery management. "They are using British Columbia stock for the foundation of their poultry industry," Mr. Smith said.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer, but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Valuable Tablets Found

Throw New Light On Religion At Time Of Abraham

Religious sculptures nearly 4,000 years old have been brought to London, England, by C. Leonard Woolley, who just returned from Ur of the Chaldees. There are important inscriptions and tablets which throw new light on the history and religion of people who lived at the time of Abraham, about 2000 B.C.

"They represent the worship of God by the common people," he said. "We found them in little chapels built along the public streets of Ur."

Australia is trying to nationalize its overseas transport.

Revise Trade Treaties

Between Twenty and Thirty Treaties Will Be Subject To Revision

Within the next year between 20 and 30 Canadian trade treaties are to be revised, according to a statement made a few days ago in the House of Commons by Hon. H. H. Stevens, Minister of Trade and Commerce. While no comment was obtainable on a cable from London, England, that Poland was seeking a commercial treaty with Canada, it is assumed representations by that country will be under consideration when other treaties are reviewed.

Poland is one of the more important European nations with which Canada has no trade agreement.

Canada's trade with Poland is at present not large. In 1930 imports from that country had a value of \$139,000 and exports from Canada \$73,000.

Majority Are Canadians

Interesting Figures About Members Of House Of Commons

Of the 245 members of the House of Commons, 215 were born in Canada, 53 are French-Canadians, those of Scotch origin number 58; 41 are of Irish parentage, and 12 of English. Religiously the membership is divided as follows: Roman Catholics, 76; United, 60; Anglicans, 49; Presbyterians, 49; Baptists, 7; Lutherans, 4; Jews, 3; Unitarians, 3; Mormons, 1. Lawyers head the list with 72 members; farmers have 32; doctors, 30; merchants, 17; manufacturers, 12; business men, 13; lumbermen, 8; druggists, 3; dentists, 4; journalists, 6; preachers, 3.

Palpitation Of The Heart Nerves Were All Gone

Miss Rose Griffin, Ashern, Man., writes:—"About five years ago I was troubled with palpitation of the heart, caused by a shock, and my nerves were all gone, and I could not sleep. I read about Milburn's Heart and Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and wish all others who suffered as I did would give them a trial."

Attacks The Dole System

Dean Inge Takes Rather Pessimistic View Of Conditions In Britain

Although he has newly returned from a Mediterranean cruise, Very Rev. Dean Inge of St. Paul's spoke in a vein at the individualist monthly luncheon, in London, England, which once more justified the well-known description which—rather carelessly—was fastened upon him some years ago. "Our financial resources are so completely gone that we could not go to war again even if we were slapped in the face," declared the dean. "Our naval supremacy has vanished, our Empire is falling to pieces. There is no confidence and no enterprise. All we can see is a vast and ever-increasing army of parasites who are paid by the state not to work. Other nations have scrapped the institutions that brought this state of things into existence. They have gone back, or are going back, to government by the few or by one."

Russia today was an enormous slave state, he said. It was not Communism, but state capitalism with an omnipotent, rather efficient government—much more efficient than that of the well-meaning, but rather stupid Romanoff family. It was a system of government which, but for its extreme cruelty, an ultra-Tory might contemplate with some favor, but which individualists must regard with horror because of its destruction of liberty.

"I am not afraid of Communism spreading over the world," continued the dean. "It attacks at once the three strongest instincts of human nature—private ownership, the family, and religion. Those who fall on these stones will be broken. I have never felt sure that state socialism must be a failure or that if tried ruthlessly enough it may not realize a certain success. Personally, I think that Russia, if it gets a more civilized government, may be a tremendous danger to the west. I do not feel able to prophesy. We do not know today whether the Russians are Europeans or Asiatics, but one has only to read a Russian novel to know that the people behave in a fashion incomprehensible to everyone else."

Soviets Make Rubber By Secret Process

Cost Of Manufacture Said To Be Very Low

The Leningrad rubber trust factory produced more than a half metric ton (more than 1,100 pounds) of commercial rubber from oil in one day by means of an unrevealed process.

The work was done under direction of a Professor Byzou, crowning experiments begun in 1918, the announcement said. It was reported the production cost was extremely low and that the new process accordingly presents tremendous commercial possibilities.

Rubber goods are being manufactured from this batch at the "Red Triangle" factory in Moscow.

War Relics Found In Park

Workmen unearthed a number of World War relics in Kelvingrove Park, Glasgow, Scotland, recently. Among them were two hand grenades and four live eighteen-pound shells. It is believed they were stolen from a munitions factory during the war and hidden in the park.

Pigeons live almost entirely on vegetables.

Lovely Skin

Vegetable Pills Did What Creams Couldn't

"I find (writes Miss E. T. Clapham) that Carter's Little Liver Pills will do more to keep the complexion clear and the skin free from blemishes than all the face creams I have used."

Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGETABLE and have a definite, valuable tonic action upon the liver. They end Constipation, Indigestion, Bilelessness, Headaches, Acidity, All druggists. 25c and 75c red packages.

W. N. U. 1892

New Star Not So Small

Composed Of Mass Many Times Larger Than Sun

The discovery that a certain comparatively small star has a mass 193 times greater than the sun was disclosed in an interview, at Toronto, by Dr. J. S. Plaskett, F.R.S., director of the Dominion Observatory at Victoria, B.C., and guardian of the world's second largest telescope. The star has not been given a name, but is known in Draper's calendar as No. 698. Its peculiar mass remains unexplained.

Before the Fellows of the Royal Society of Canada and a public audience, Dr. Plaskett described the structure and motions of the galaxy. In his opinion it is a vast, watch-shaped system of stars, about 200,000 light years in circumference, and 10,000 light years in thickness, but scientific estimates of the size are subject to disagreement. That this system is in rotation like a huge, spinning disc, is the view of most modern astronomers, said Dr. Plaskett. Another hypothesis, however, has been advanced by Harlow Shapley of the Harvard Observatory, who suggests that galaxy consists of a number of spiral nebulae.

Dr. Plaskett remarked that there is a need for more astronomical work in the southern hemisphere. "Much of the money spent for observatories in the north might well be directed to the southern skies," he said.

England Needs Trained Nurses

Surplus In Canada Might Help Solve Problem

The problem of Canada's surplus in the nursing profession and England's scarcity in the same field is particularly interesting to Miss E. Thompson, C.B.E., of Suffolk, England, the organizer of the tour of the English headmistresses who came to study educational methods in Canada. Miss Thompson hopes some method of co-ordinating the two situations might be arrived at in the near future so that England's need for nurses will be filled and Canada's unemployment among nurses be materially helped. Miss Thompson is a member of the Lancet commission which is at present delving into the problem of cancer research and is therefore doubly interested in the medical situation of Canada, as compared with her own country.

Students Earn Way Through University

Boys In Jugo-Slavia Belong To Self-Help Group

Samopomosh is the name of a group of university students in Jugo-Slavia. The word means self-help and the students do some outside work each day in order to earn money to pay for their education. From six until eight in the morning the "Self-Help" student goes the milk round, and his lusty voice can be heard crying the Yuko-Slav equivalent for Milk-O. He can earn enough this way to pay for his board at the Student House in Belgrade.

The idea was first started about a year ago, and now eighty young people are earning enough to follow the classes at the university, with the whole day free in which to do it.

Historical Carpet Is Sent To Washington

Gift From King George To Smithsonian Institution

The receipt from King George of a carpet on which his grandmother, Queen Victoria stood when she opened Crystal Palace in London, England, in 1851, is announced by the Smithsonian Institution at Washington. The carpet, manufactured in Scotland and considered in its time the highest example of the carpet weaver's art, is 45ft. long and 17ft. wide. It was found in a London warehouse by Sir Auckland Geddes while searching for furnishings for the British Embassy in Washington. For years it graced the ballroom of the Embassy, but, on account of its historical value, it was not removed to the new Embassy building.

For Studying Sunlight

A new instrument, called the "thermo-electric pyranometer," has been developed to make a scientific study of sunlight, its effect on the human body, etc. It registers changes in sunlight like the seismograph records tremblings in earthquakes. Changes in the amount of sunlight the earth gets, it has been pointed out, are due to causes within the sun itself and to shifting haze and clouds in the air.

Equal In Intellect

Tests of more than 7,000 school children at Columbia University have shown that a stutterer is the intellectual equal of a normal child, that his vocabulary is as good and usually that he is physically superior.

Explorer Died In Arctic

Body Of German Professor Found By Rescue Party

Arctic rigors have claimed another illustrious explorer and scientist. Word received at Berlin that the body of Professor Alfred L. Wegener, head of the German expedition to central Greenland, had been found by a rescue party dispelled the last lingering hope that he would be found alive.

Missing since November 1 when he started out with only a native companion for his base on the western edge of the Greenland ice cap—a journey of about 250 miles—Dr. Wegener's body was found some 90 miles from his central camp at Eismitte, his starting point.

The body was clothed warmly in fur and it is thought he succumbed to heart disease. His personal belongings were missing, presumably having been removed by his companion, Rasmus, of whom no mention was made in the brief advices received.

The 50-year-old scientist led his expedition into Greenland in April, 1930, intending to spend 18 months there studying meteorological and scientific data.

Promoters of Dr. Wegener's expedition announced that his work would be carried on according to program under the leadership of his brother, Professor Kurt Wegener, who plans to sail early in June for Greenland via Copenhagen.

Latinize Chinese Language

Reduction Of Chinese Sounds Into A Few Alphabetical Elements Would Help A Lot

The Institute of Eastern Culture at the Academy of Science has been commissioned to Latinize the Chinese language. The work is in charge of Professor Vasily Alekseyev, who is one of the greatest Sinologists (scholar of Chinese) in the world.

Tremendous political importance is attached to successful Latinization of the Chinese language. It is very difficult for the average Chinese to learn Chinese writing at the present time. It is therefore very difficult to spread literacy among the Chinese masses.

The reduction of the Chinese sounds into a very few alphabetical elements will exert a tremendous influence on the cultural and political fate of this nation of 485,000,000 people, or nearly one-fourth of the population of the world.

The work of Latinization is being done under the auspices of the Mongol National Republic, popularly known as Outer-Mongolia. It is alleged that the Chinese generals and other conservative elements in China are vehemently opposed to this reform and regard it as a Bolshevik propagandist stunt.

Possible Waste Gas Might Be Utilized

Over Three Million Cubic Feet Escapes Daily In Turner Valley

Possibility of recovering for a useful purpose 3,000,000 cubic feet of natural gas which escapes daily in the Turner Valley, Alberta, was suggested to the Royal Society of Canada, in a paper by Dr. M. C. Boswell and A. M. Boulton, of the Department of Chemical Engineering, University of Toronto.

The chemists have demonstrated the successful conversion of the gas into two more useful gases, carbon monoxide and hydrogen. These two gases, it was stated, have many industrial applications, but before they can be applied commercially it will be necessary to work out what the operation of a plant would cost.

Wise mothers who know the virtues of Mother Grace Worm Exterminator always have it at hand, because it proves its value.

The Russian Way

Because of recent numerous breakages of machinery in factories and collective farms, the Supreme Court has issued instructions to officials of all district courts throughout the Soviet Union that henceforth "carelessness will be considered a crime and all offenders must be tried under criminal statutes." Conviction would carry with it imprisonment or exile.

The oldest wooden combs from Egypt resemble closely the shape of the human hand—which was of course the first comb.

Dogs Aid French Smugglers

Average Animal Can Carry Ten Pounds Of Contraband

Tobacco costs 20 cents a pound in Belgium and just across the border, in France, the price is \$1.20. As a consequence there is widespread smuggling traffic across the border between the two countries.

Almost any night French smugglers may be seen in heavily wooded sections of Belgium at the border, gliding from tree to tree accompanied by their dog couriers, awaiting an opportunity to strike across the line.

On the other side pairs of French customs men are hidden behind bushes with their killer dogs awaiting for their prey.

The average smuggler's dog carries ten pounds of contraband. The profit for each successful journey is \$10. Only a few hours are required and the business is a popular one. There is no risk for the smuggler, but for the dog there is death.

Usually a half-breed shepherd or Alsatian canine is used. Invariably the smugglers' dogs are overtaken by the government killers and another death—perhaps two—is chalked up in what might be termed an epic battle. When the customs men come running up at least one of them and perhaps both, will be dead. It is generally the professional killer that wins these sanguinary battles, he says.

A famous dog called "Gamin," belonging to the Valenciennes brigade of the customs service, was himself killed in battle after he had finished off ninety-two smugglers during his career. The customs men get a bounty of 12 cents for the left hind foot of every tobacco smuggler killed.

To combat the illicit frontier running, the French customs men have resorted to the old Indian trick of bending over a young sapling and hanging a looped rope from it. A piece of meat suspended inside the loop serves as a bait and releases the trap when it is touched.

Poorly trained dogs that are foolish enough to stop on their way to nibble at the meat, suddenly find themselves caught around the neck or midriff and jerked into the air. Somewhat similar traps are placed on the ground anchored to a sack of sand.

These devices for tempting the smugglers with food along their way are particularly effective, because the dogs are always hungry when they start across the frontier. To insure that their dogs head straight for home, the smugglers feed them well at home and not at all in Belgium.

The average smuggler starts his animals for home via the woods and then gets home by himself, whistling a gay tune as he passes the customs post.

The customs men know perfectly well what he has done, but have no proof.

If his dog is killed, he will buy a new one, for big shepherds, Groenendals and police dogs are common.

Occasionally the runner is particularly speedy and will reach his destination—some lonely farm house—before being overtaken, but in the majority of cases the killer catches up with him.

Another type of smuggler uses a dog to aid him but in a different way. With forty or fifty pounds of tobacco on his own back, he tries to slip across the frontier in the darkness without being seen. If he is spotted by the customs men and their dog, he depends on his own animal to pull him along at almost double the pace of his pursuers. Powerful dogs literally can jerk a man off his feet.

Movements Of Magnetic Pole

Swings From East To West Daily Says Arctic Explorer

Major T. L. Burwash, the eminent Canadian Arctic explorer, reports that the North magnetic pole moves about seven miles every day. "It was thought that the magnetic pole was gradually changing its position," he said, "but, when I went North a few years ago to study it, I found it in the same position that it had been a hundred years before. I remarked, however, that it swings east and west each day, reaching its most easterly point at seven in the morning, and returning to rest at its most westerly point about five o'clock in the evening. The pole is always in that position when the sun sets."

April Fools day originated with the Hindus, who celebrated it on March 31, but the Romans' Feast of the Fools was held on February 17.

Ambergris, valued in perfume manufacture, looks like dirty tallow when it is found floating in the sea.

Number Of People Afraid Of Lightning

And Still Will Risk Their Lives In Many Ways

It is surprising to find the number of people who are terrified of lightning, in spite of the fact that the records go to prove that very few persons have ever been struck by lightning.

As a matter of fact there is no reason for terror, but when nature starts her fireworks it is useless to point this out to many people.

It really is surprising. There are men—who are not talking about women—who will shiver at a flash of lightning, even rush for cover.

Yet these same men are not afraid to try and beat a train over a level crossing, or not afraid to cut in and out of traffic on a crowded highway, even if they have the family with them in the car.

And there are men who think nothing of trying to pass a car on the face of a hill, or of driving at a rate of sixty and seventy miles an hour, who will not drive at all in a thunder storm, because they are afraid of lightning.

There are men who are afraid of lightning, who are not afraid to rock a boat; to lie, to steal, even to be high pressure salesmen. The list, in fact, is long, if not endless.

True, lightning has proved fatal, but even if it chose all its victims from the class of birds we have mentioned, scarcely a gap would be made in the ranks, we would still have them with us, a pest on the land.

A Unique Industry

Town Of Norway, Maine, Has Large Snowshoe Plant

Snowshoes and skis may be out of season, but not in the small town of Norway, Maine, on the Norway branch of the Grand Trunk Railway, branch of the Canadian National Railways.

One of its largest industries is the manufacturing of snowshoes and skis and it boasts the largest ski and snowshoe factory in the new world. Improved machinery now being installed will greatly increase the present annual output of 10,000 pairs of snowshoes and 60,000 pairs of skis.

Each year the hides of 3,000 steers are cut up for snowshoes filling or strings, and 200,000 feet of white ash are used for the frames. Snowshoes varying in size from a child's model measuring 9 inches by 32 inches to a 6-foot Peary model are made in Norway as well as skis from 3 to 9 feet in length.

Mellie Dunham, of fiddling fame, who lives in Norway, designed and made the snowshoes used by Rear Admiral Robert E. Peary on his successful dash to the North Pole.

Effective Fog Horn

Toronto Professors Working On An Entirely New Type

The most effective fog-horn in the world was perfected by John Northey of Toronto, and is now being used by many foreign countries, Prof. Louis V. King, of McGill University, told the physics section of the Royal Society of Canada recently.

Prof. King and Prof. C. U. Vesot are now working on an entirely new type of fog-horn, it was announced. This horn would enable a ship to determine its exact distance from the danger point. Simultaneous warnings would be sent out by sound and by radio, and picked up by a delicate mechanism on shipboard. Using the difference in time between the arrival of the sound warning and the arrival of the radio warning the ship's crew would then be able to calculate the distance over which the message had come.

Douglas' Egyptian Liniment relieves toothache and neuralgia. Invaluable in cases of croup, sore throat and quinsy. Keep a bottle handy.

Adds Value To Home

Shrubbery Which Is Carefully Planted Is Real Asset

Carefully planted shrubbery adds charm and value to the home. Authorities agree that best effects are secured by confining the shrubs to the border and to the base of the dwelling, leaving an open lawn. In foundation planting shrubs of different heights should be chosen and the planting arranged irregularly and so placed as to conceal the alignment without completely covering the foundation.

Suitable shrubs are described by the Dominion horticulturist in the federal department of agriculture bulletin No. 89, which also tells how to go about the planting.

Seventy-five years ago tomatoes were called "love apples," and were cultivated for ornament, not for food.

John: "What do you do when the brakes on your car give way?" Bruce: "Hit something cheap."

There Should Be No Ugly Women!

There are 2 classes of women.

(1) The beautiful, healthy and attractive creatures.

(2) Those pitiful ones who don't know how to make themselves beautiful—rather those who don't know the vital importance of Kruschen Salts to physical perfection and attraction.

Kruschen Salts are a perfect blend of the six vital minerals which Nature ordained, glands, blood, nerves and body organs should daily receive from food if they're to function correctly—and which are impossible to obtain in this age of modern cooking.

Get a bottle of Kruschen—and before the bottle is half empty your complexion should be gloriously smooth and clear. Kruschen clears blood of harmful acids and poisonous waste matter which cause blemishes, blackheads and pimples. Your wonderful new energy will surprise you—mind feels so keen and alert—no more washed-out feeling getting up in the mornings.

Whatever hath been written shall remain. Nor be erased, nor written o'er again; The unwritten only still belongs to thee.

Take heed and ponder well what that should be.

—Henry Wadsworth Longfellow.

We cannot undo the past and begin afresh. We have to take the past as the starting point and determining element of the future. But the gospel reminds us that what cannot be obliterated may be transmuted by divine grace. In Christ Jesus we may become new creatures; and in the eternal life that we begin in union with Him all old things, so far as there is any condemning power in them, pass away, and all things in the transfiguring light of heavenly love become new.—Hugh McMillan.

Turkish City Dwindling

Constantinople Is Rapidly Losing Place As World City

Constantinople, once the proud capital of the sultans, is gradually dwindling into insignificance as a world city. In 1924 a rough census of Istanbul, as Turks call the city, showed a population of 1,065,000, of which about 656,000 were Moslems, 297,000 Greeks, 73,000 Armenians and 12,000 Jews. Three years later a more accurate census was taken and the city had then a population of only 673,000. Recently the municipal electoral committee, while taking a census in preparation for the elections, found that the population of Istanbul has slipped downward 119,000 since 1927. Evidences of commercial stagnation are apparent on every hand.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Cattle Shipments To Britain

Livestock Shipments In 1930 From August To End Of Season Reached 3,581 Head

Following the revival last summer, after an absence of some years, of Canadian live cattle shipments to the British market, 3,581 cattle reached the port of Manchester from the Dominion between the initial shipment made in August and the end of 1930, writes Harry A. Scott, Canadian Trade Commissioner, at Liverpool, in the Commercial Intelligence Journal.

Brighton's life-boat station, established in 1825, and one of the oldest on the English coast, is to be abandoned and a powerful motor lifeboat established at Shoreham a few miles away.

CORNS LIFT OFF

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

Town & District

Old Sun school is putting on a sports day presently for their own pupils.

Saturday the people of Arrowwood and district will vote on the question of having a beer parlor.

Old Sun School has a foot ball team that Rev. J. W. House guarantees can beat anything the Gleichen school can produce. How about it boys.

Wheat being so cheap, it is now used at weddings instead of confetti and rice.

Mr. and Mrs. Geo. Matthews of Vancouver were in town for a short time last Thursday, meeting old friends. They left in the evening for Edmonton.

The Canadian women's track and field championships of the W.A.A.F. of Canada and the Provincial junior track and field championships will be held in Wetaskiwin August 11th and 12th. These national and provincial events are doubtless of interest to all athletes of the Province in particular.

Shooting crows and magpies is a popular pastime just now.

Mrs. Postle of Winnipeg is at present visiting her parents Major and Mrs. Lewis.

Mr. and Mrs. J. Woddel, daughter and son-in-law, of Calgary visited Mrs. W. P. Evans on Sunday.

For good home made meals, light lunches, refreshments of all kinds ice cream, visit the Rose Tea Room.

Mr. and Mrs. Eli Woods entertained at a shower Monday evening in honor of Mr. and Mrs. A. Sauve, who were recently married. Five tables of whist were played and at midnight a delightful luncheon was served.

Alex Lewis is home from Medicine Hat visiting his parents Major and Mrs. Lewis.

At present there is a plague of moths in town. In the evening they are flying around by the thousands.

The mosquitos, at last are busy.

Last Friday, Jack Moss had W. Boos bank up the Distributors warehouse with earth. He believes in being prepared for winter.

A train load of girls went through the other evening for Lake Louise and no Gleichen bachelor boys were on hand to greet them.

Mrs. Duncan McBean has received word of the death of her mother Mrs. James D. Lynn, at Rutherglen, Scotland at the age of 89 years.

Alan Clark, son of Mr. and Mrs. Duncan Clark of Cluny, tripped and fell, while carrying a pail of water one day last week and dislocated his wrist and broke two bones in his hand. Dr. Farquharson set the broken members.

The Alberta government is just beginning to take action under the Highway Signs Act, passed more than a year ago. Several organizations having road signs on the various highways have been ordered to remove them at once or action will be taken through the courts, it is understood. The signs must be placed 165 feet from the centre of the highway. At the present time hundreds

of road signs are placed along the sides of all the important provincial highways, and, obviously the provincial government regulation are not being observed.

Down at Bassano they are talking about passing a by-law to extend the Wednesday half holiday the year round instead of from May 15 to August 15 as at present. The only advantage a year round half holiday might have is possible inconvenience to farmers during the seeding and harvesting periods when they must get repairs and supplies on the shortest possible notice. Advocates of the year-round half holiday plan claim the disadvantage is more imaginary than real and that in case of emergency no farmer will be inconvenienced.

Oyster shell, great beds of them have been found on the Oldman river near Hillspring, Alta., and will be developed commercially. The oyster shell, according to tests made at the University of Alberta laboratory, is almost pure lime and will be marketed by a syndicate as fertilizer, poultry feed and lime. The shells are deposits from prehistoric times. Vestiges of marine life when this portion of the west the bed of a great sea.

CORRESPONDENCE
(The Call must not be held responsible for the opinions of correspondents.)
Editor CALL,

Town looks much better?
W. W. Brown and his cement "busters" has removed 137 loads of concrete including the foundation of the Griesbach Hall built by myself in 1910. I would like to know the cost of this. The town of Gleichen has not paid one cent towards the building of this Hall. I do not like the remark the "old Gleichen Opera House". The Hall and the Palace Hotel was a credit to this town, read the Henderson Directory 1911. The people of Gleichen and outsiders should remember the benefit they had during the war, and most the taxes I paid. My wish was to let these two foundations, as they stand after the fire as they would be very handy some day to come. I write this to let the outsiders judge on this. So I will say as the Lord has sent us rain the town looks green and the trees coming on fine. The townspeople should be thankful.
EMIL GRIESBACH,
"STILL A TAX-PAYER"

POUND SALE

Impounded in the pound kept by Felix Desjardine on the S. W. 22-23-22-4th., on the 4th, day of June 1931 and sold on the 19th, day of June 1931, aged white horse, weight 1400 brand L.S. and G.

R.H. to Mrs. Felix Desjardine of Gleichen.

For further information apply to W. E. Thompson, Sec.-Treas., M. D. of Blackfoot, No. 218, Gleichen, Alberta.

NOTICE
There must be no tampering with anything in connection with the reservoir. Parents notify children to leave everything alone.

World's Grain Exhibition and Conference

Farmers Will Win
\$210,750.00 in Prizes

The World's Grain Exhibition and Conference offers Canadian farmers an opportunity to share in cash prizes amounting to \$210,750.00. Comprised in 55 competitive classes, open to the whole world, are 1,701 cash prizes. A few of the major awards follow:

\$2,500 a first prize for 50 pounds of wheat, 30 pounds of oats.
\$1,500 for 40 pounds of barley, 50 pounds of rye.
\$ 800 for 10 ears of corn.
\$ 300 for 30 pounds of peas, 30 pounds of flax, 20 pounds of clover.

With this splendid opportunity before them, Canadian farmers should keep a watchful eye on their growing crops. They should mark for special care those areas that appear most promising. It should be understood that all seed and grain samples, if they are not already selected, will have to be found in crops of this year. All exhibits must be received by the Exhibition authorities on or before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will be the winning of World Championships in 1932 by farmers of Canada. Their seed and grain exhibits must demonstrate to the world the quality of Canada's field crops.

Select the classes from the prize list most suited to the crop you grow, then select your samples from the best you have.

It is best to make your entry NOW.
Your sample for exhibit must be in the hands of the Secretary at Regina on or before March 1, 1932.

Valuable information relating to the preparation of grain and seed for exhibit may be secured by writing to the Secretary of the Provincial Committee, World's Grain Exhibition and Conference, care Department of Agriculture, your own province.

Show what you grow and share what you know

On application, the Secretary, World's Grain Exhibition and Conference, Imperial Bank Chambers, Regina, will send you price list, rules and regulations governing competitive entries and all other information.
